

Rise You Downtrodden Blacks

The book is an observation and analysis of the status of black people all over the world. It does not only observe and analyse but goes as far as making recommendations about how blacks can be saved from other races and, more importantly, from themselves. Controversially, he is completely against reparations for slavery. Also controversially, this book asserts that the world cannot defeat racism without recognising the scientific basis and justification for racist behaviour. It also states that Al Qaeda is a racist organisation. Using Donald Trump as an example, the book warns Africa not to copy everything about Western culture without thinking. The book suggests how blacks can extricate themselves from their low status and esteem through various actions such as language reform, business linkages, and due attention to science.
