

## New Developments in Fundamental Interaction Theories: 37th Karpacz Winter School of Theoretical Physics, Karpacz, Poland, 6-15 February, 2001 (AIP Conference Proceedings)

This volume contains a variety of papers devoted to current problems and solutions in fundamental interaction theories, including symmetry and supersymmetry, string and brane theories, non-commutative geometries, non-commutative models of space-time and quantum groups. The authors of contributions are leading specialists in these fields of theoretical and mathematical physics.
